Digital Marketing Strategy

Connecting Farms with Food Businesses

Presented By: Mou Gharami

Batch Id-WA-522-AS-DM-April 1-2026

ACKNOWLEDGEMENT

Prepared by:

Mou Gharami

I sincerely express my gratitude to my mentor, **Arjun Singh**, for his valuable guidance, continuous support, and encouragement throughout this project.

I am also thankful to **Webskitters Academy** for providing quality Digital Marketing training, practical learning opportunities, and a professional learning environment that helped me strengthen my digital marketing skills.

I am truly grateful for the knowledge, guidance, and experience gained throughout this learning journey.

BUSINESS UNDERSTANDING

BUSINESS SUMMARY

Fambo

Tech-enabled food supply platform for restaurants, hotels and cloud kitchens (HoReCa)

Tagline /Vision

Nurturing Human Civilisation through Technology that Transforms Food Systems

.

Primary Competition

WayCool, Ninjacart, FreshToHome (B2B), Crofarm, UDAAN HORECA360

Key Investors

AgriSURE Fund (NABVENTURES), EV2 Ventures, Rajesh Sawhney (GSF Accelerator)

Founded In 2022

Noida, Uttar Pradesh

Business Model B2B

Akshay Tripathi, Sudarshan Satle, Sushanta Kumar

Fambo

12,000+
TONNES OF FRESH PRODUCE HANDLED ANNUALLY

ABOUT US

FRESHNESS FROM
FARM TO FORK

Connecting farms to food businesses with quality ingredients, smart technology and reliable supply

OUR BEGINNING

Fambo works across farming, technology, processing and distribution to improve food supply systems and help reduce waste.

OUR PRODUCTS

Fresh fruits and vegetables, cut and chopped produce, frozen and fried items, sauces, gravies and other cooking ingredients.

OUR TECHNOLOGY

Al-enabled food management and supply-chain software supports timely delivery, operational efficiency and farm-to-fork traceability.

OUR REACH

Fambo currently serves food businesses across Delhi-NCR, including Delhi, Noida, Gurugram, Ghaziabad and Faridabad.

OUR CUSTOMERS

Quick-service restaurants, chain and speciality restaurants, cloud kitchens, hotels, caterers and canteens.

QUALITY & TRUST

Sourcing from GAP-certified farms, with food-safety and quality processes aligned with GAP, FSSAI, ISO and NSF requirements

OBJECTIVES

- Deliver fresh, traceable produce from GAP-certified farms to restaurants
- Reduce kitchen labour, prep time and food waste through ready-to-use, semi-processed ingredients
- Eliminate middlemen so customers get fair, transparent pricing
- Support farmers from crop planning to procurement
- Expand beyond Delhi-NCR across India and build an export vertical
- Build brand awareness among restaurant owners and procurement managers (the goal of this marketing project)

CHALLENGES

- **(25-35% loss):** From the StartupFeed article, which attributes the figure to Fambo's founder in an Inc42 interview.
- **(kitchen problems):** The same StartupFeed article describes prep waste, taste inconsistency and labour cost as the problem Fambo solves.
- **(mandi and local vendors):** Fambo's own FAQ addresses buyers who currently use mandis, so the pain point is real. Framing it as a challenge is my inference.

- **(competition):** From Entrackr, Entrepreneur and Tracxn. The list is sourced, but calling the competition "strong" is my judgement.

- **(Delhi-NCR only):** The Delhi-NCR coverage is on Fambo's website. The point about needing new supply networks is my inference.

- **(low online visibility):** This one is not verified and partly wrong. I only read the homepage and About page, so I can't say there is no blog. The homepage also says orders can be placed by app, phone, WhatsApp or email, so "only an email form" is incorrect.

Fambo

BUSINESS USP

What Makes Fambo Special?

01 FRESH SOURCING

Fresh fruits and vegetables from trusted farm networks.

02 PRODUCT RANGE

Fresh produce and value-added food ingredients.

03 QUALITY & SAFETY

Focus on hygienic handling and quality standards.

04 TECH-ENABLED SUPPLY

Technology supports traceability and timely delivery.

05 CUSTOMER FOCUS

Solutions for restaurants, QSRs and cloud kitchens.

06 VALUE-ADDED PRODUCTS

Cut, chopped and semi-processed ingredients.

From Plant to Plate

SWOT ANALYSIS

Fambo | Taste. Trust. Together.

01 STRENGTHS

- Fresh produce sourced through farm networks.
- Wide range of fresh and value-added ingredients.
- Focus on quality, traceability and reliable supply.

02 WEAKNESSES

- Maintaining consistent supply across products requires coordination.
- Service coverage and product availability may vary by location.

03 OPPORTUNITIES

- Growing demand from restaurants and cloud kitchens.
- Expand value-added and ready-to-use ingredients.
- Use digital marketing to reach more B2B buyers.

04 THREATS

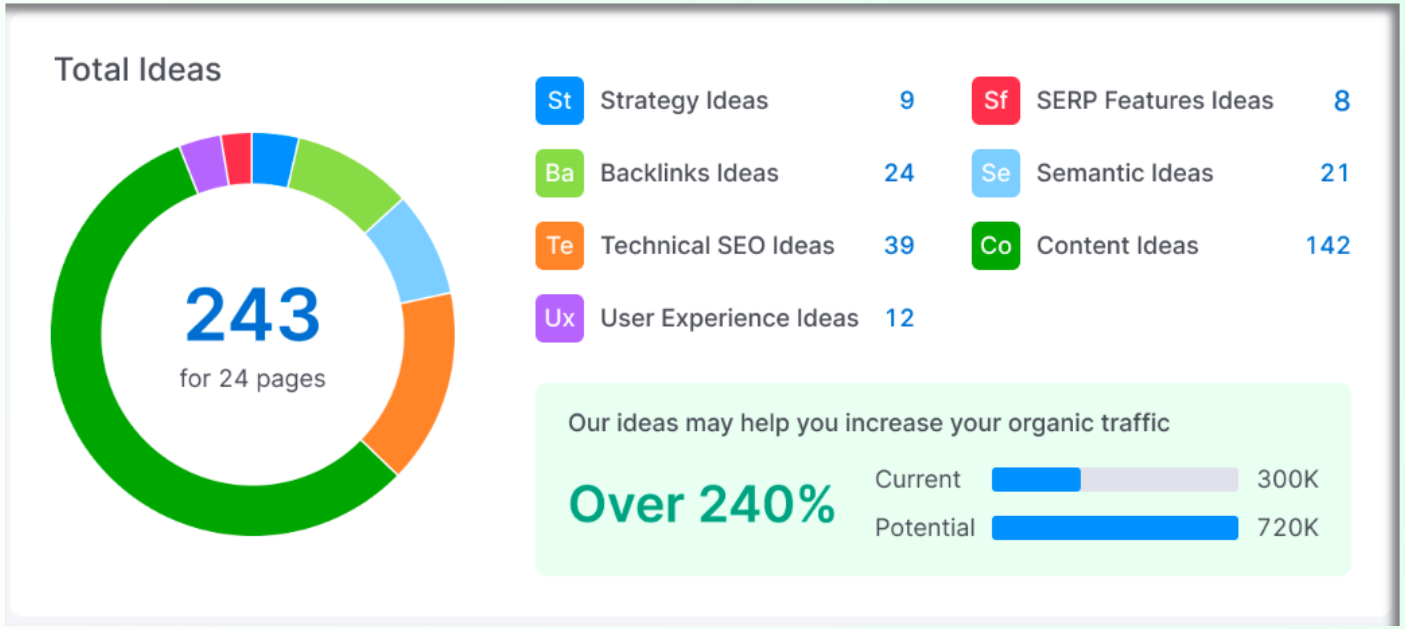

- Competition from local vendors and larger suppliers.
- Seasonal price and availability fluctuations.
- Food safety and delivery expectations remain high.

Fambo

SEO AUDIT & GROWTH PLAN

WEBSITE CURRENT SCENARIO

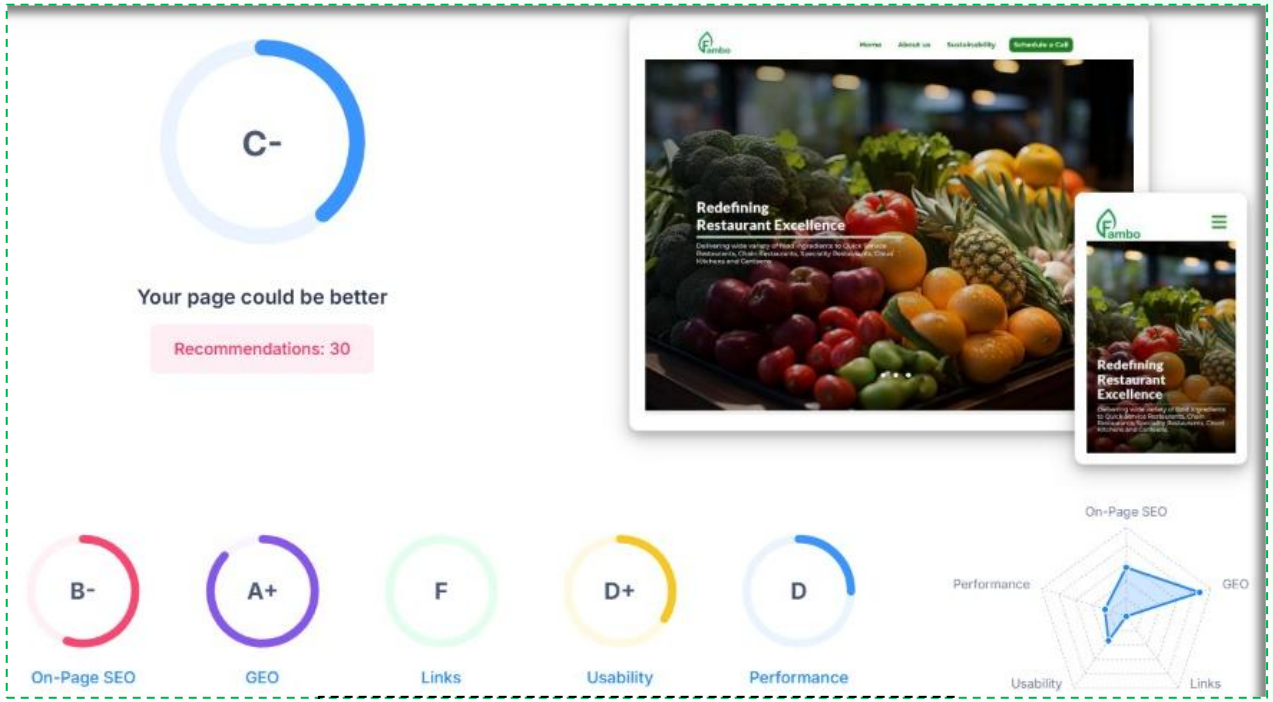

Source: Semrush

Right now, the website has a strong opportunity to improve its organic traffic, with 243 SEO ideas identified across 24 pages. The SEO analysis highlights several areas for improvement, including content, technical SEO, backlinks, semantic SEO, user experience, and overall strategy.

Content ideas represent the biggest opportunity, followed by technical SEO and backlink improvements. With the right SEO optimizations, content improvements, and strategic changes, the website could potentially increase its organic traffic by over 240%. The current traffic of around 300K could potentially grow to approximately 720K, bringing significantly more visibility and traffic to the website.

OVERALL SEO AUDIT

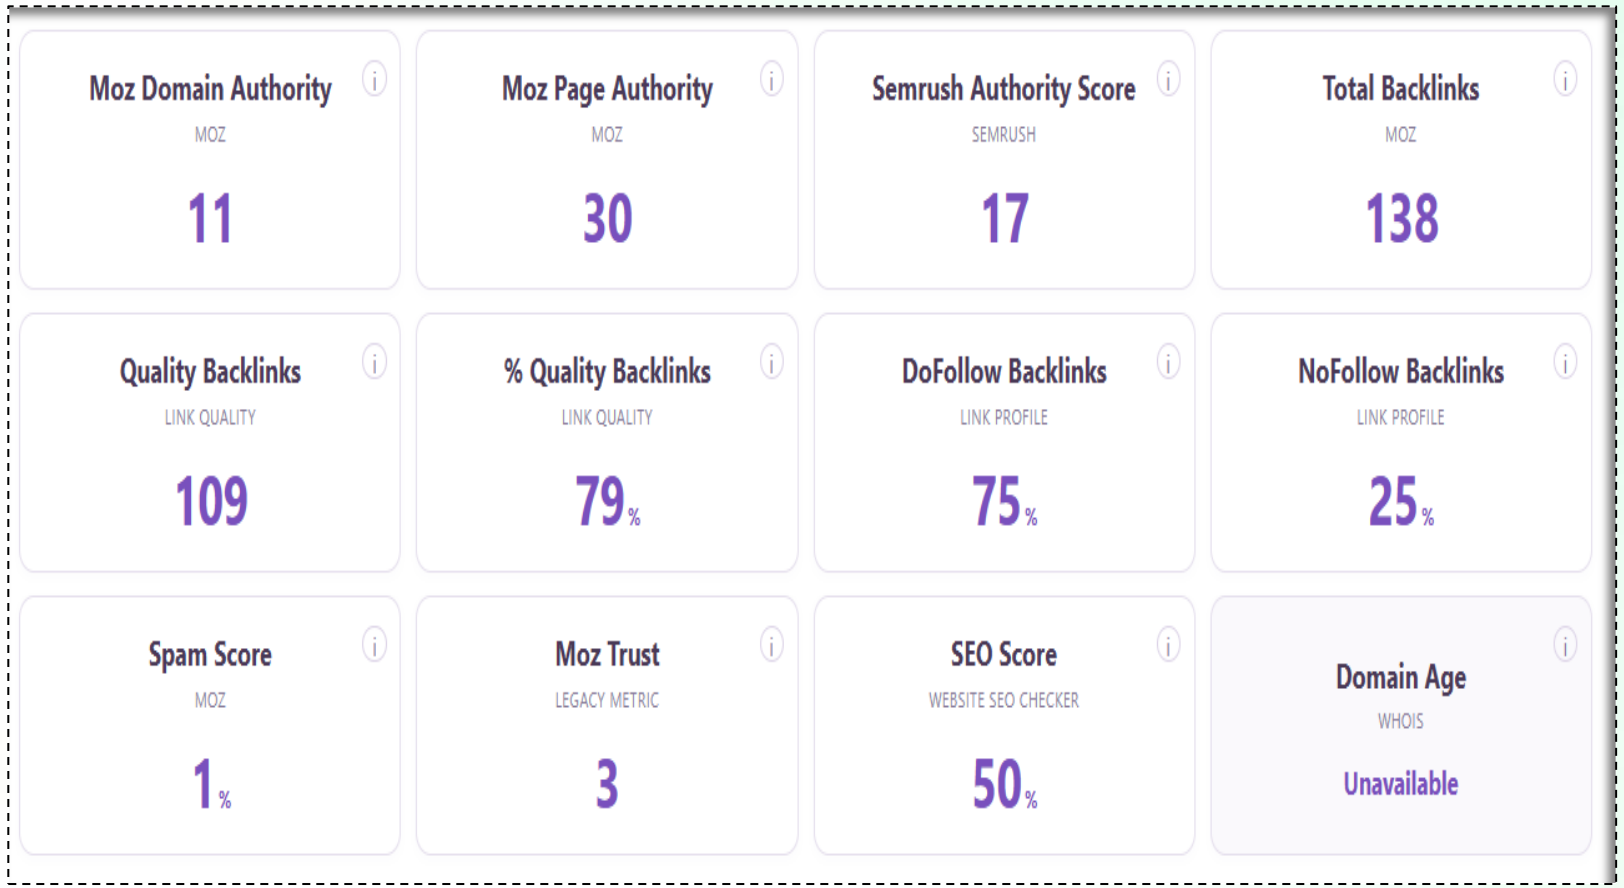

Source:SEOptimer

Please Note:
The data presented in this SEO audit is subject to change over time due to evolving search engine algorithms, website updates, and external market dynamics.

INSIGHTS

- **The site has a strong SEO foundation**, with an **A+ SEO score**, but the overall score is affected by weaknesses in other areas.
- **Improve on-page SEO elements** by optimizing title tags, meta descriptions, headings, target keywords, image alt text, and overall content relevance.
- **Build a stronger link profile** by earning high-quality backlinks from relevant and authoritative websites, as the **Links score is F**.
- **Improve website usability** by making the site easier to navigate, mobile-friendly, and accessible to users across different devices.
- **Improve website performance** by optimizing image sizes, reducing unnecessary scripts, and improving page-loading speed, as the **Performance score is D**.
- **Address the 30 recommendations** identified in the audit and prioritize the technical and link-related issues first to improve the overall SEO score.

WEBSITE AUTHORITY SCORE

Source: Website Sco checker

Please Note:
The data presented in this SEO audit is subject to change over time due to evolving search engine algorithms, website updates, and external market dynamics.

INSIGHTS

- **DA: 11** and **PA: 30** indicate room to improve website authority.
- **138 total backlinks**, including **109 quality backlinks**.
- **79% quality backlinks** provide a strong foundation.
- **75% DoFollow backlinks** can support SEO growth.
- **1% Spam Score** indicates a clean backlink profile.
- **SEMrush Authority Score: 17** shows scope for stronger authority.
- **SEO Score: 50%** indicates further optimization is needed.
- Focus on earning **high-authority, relevant backlinks** to improve overall performance.

WEBSITE TRAFFIC ANALYSIS : 1/2

Source:similarweb

Please Note:
The data presented in this SEO audit is subject to change over time due to evolving search engine algorithms, website updates, and external market dynamics

INSIGHTS

The website received **5,310 total visits**, with **3,118 monthly visits.** The **bounce rate is 39.62%**, indicating that a good portion of visitors continue exploring the website after landing on a page. **Mobile users account for 66.21% of traffic**, while desktop users contribute 33.79%, showing that mobile optimization is particularly important. Overall, the website has a strong mobile audience and a reasonable level of visitor engagement, but there is still scope to increase traffic and improve user retention.

WEBSITE TRAFFIC ANALYSIS :2/2

INSIGHTS

- Total website visits during **June–August 2026: 6,277**.
- Traffic shows a **gradual upward trend in June**, reaching around **1,000 visits** at its peak.
- Visits then **decline sharply in early July**.
- A strong recovery occurs around **mid-July**, with traffic reaching its highest point at approximately **1,100 visits**.
- From late July onward, traffic **drops significantly** and remains relatively low through August.
- Overall, the data shows **fluctuating traffic with two notable peaks**, suggesting an opportunity to identify which content, campaigns, or SEO activities caused those increases.

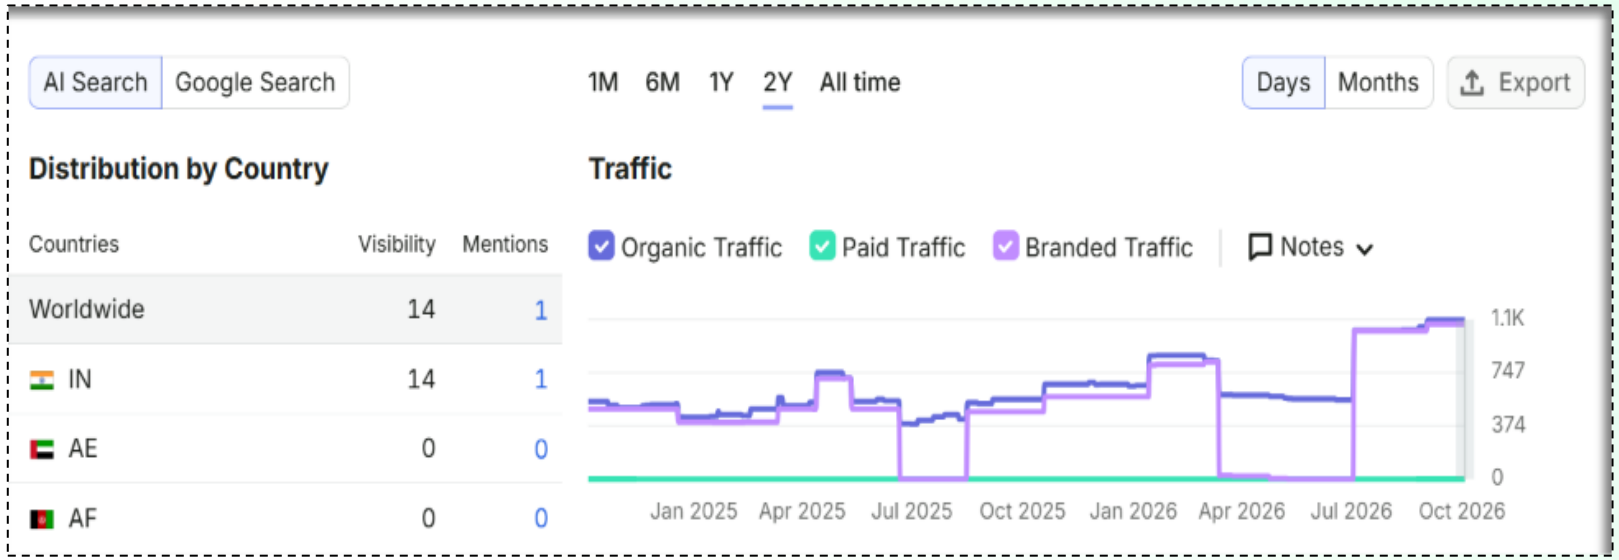

Source:similarweb

Please Note:
The data presented in this SEO audit is subject to change over time due to evolving search engine algorithms, website updates, and external market dynamics

ORGANIC TRAFFIC ANALYSIS

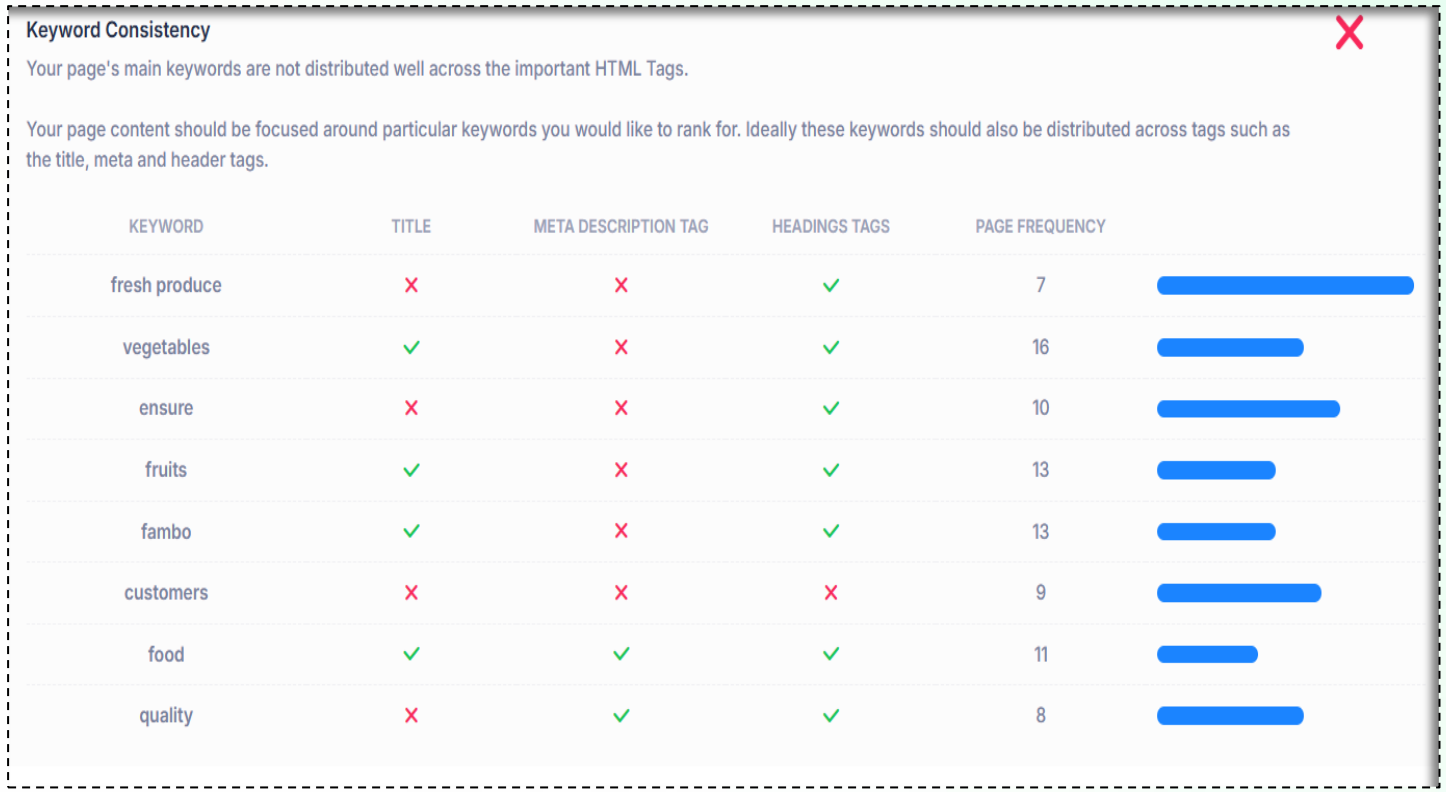

Source: Semrush

INSIGHTS

- **Organic traffic is the main traffic source**, while paid traffic appears minimal.
- The traffic trend shows **steady growth with some fluctuations** over the period.
- There is a **strong increase in traffic around mid-to-late 2026**, reaching its highest level toward the end of the chart.
- **Branded traffic** also shows growth, indicating increasing awareness of the Fambo brand.
- Country-level visibility is strongest for **India (IN)**, with **14 visibility and 1 mention** shown in the report.
- Overall, the website is showing **positive organic-search growth**, but there is an opportunity to improve visibility and mentions across additional countries.

Please Note:
The data presented in this SEO audit is subject to change over time due to evolving search engine algorithms, website updates, and external market dynamics

KEYWORD CONSISTENCY

Keyword Consistency

Your page's main keywords are not distributed well across the important HTML Tags.

Your page content should be focused around particular keywords you would like to rank for. Ideally these keywords should also be distributed across tags such as the title, meta and header tags.

KEYWORD	TITLE	META DESCRIPTION TAG	HEADINGS TAGS	PAGE FREQUENCY
fresh produce	✗	✗	✓	7
vegetables	✓	✗	✓	16
ensure	✗	✗	✓	10
fruits	✓	✗	✓	13
fambo	✓	✗	✓	13
customers	✗	✗	✗	9
food	✓	✓	✓	11
quality	✗	✓	✓	8

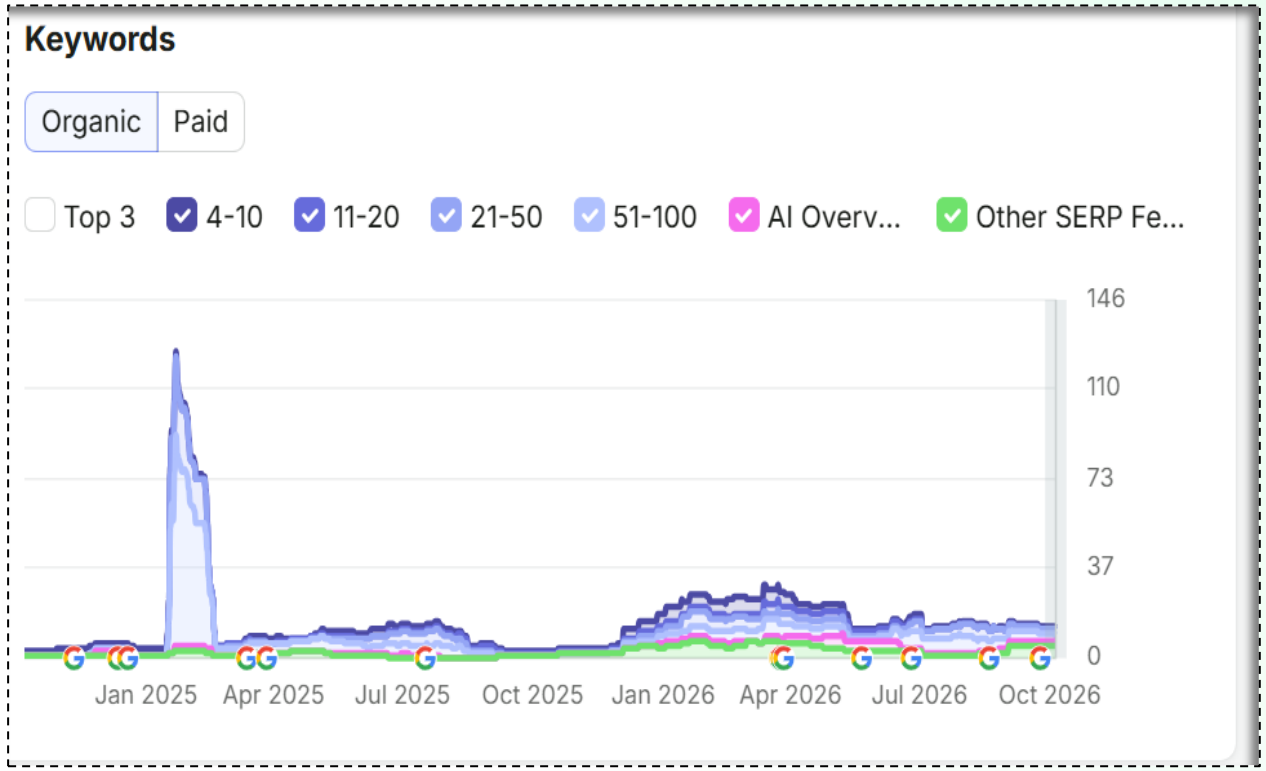

Source:SEOptimer

Please Note:
The data presented in this SEO audit is subject to change over time due to evolving search engine algorithms, website updates, and external market dynamics

INSIGHTS

The keyword consistency analysis shows that the page needs improvement in distributing its main keywords across important HTML elements. Keywords such as **“fresh produce,” “vegetables,” “fruits,” “Fambo,” “customers,” “food,” and “quality”** are used with varying frequency, but they are not consistently included in the title, meta description, and heading tags. Improving keyword placement across these elements can help strengthen the page’s relevance and overall SEO performance.

ORGANIC KEYWORDS ANALYSIS : 1/4

Source: Semrush

INSIGHTS

- In early 2025, keywords shot up very fast to about 140. Some content ranked well for a short time.
- After that, keywords dropped quickly and stayed very low through 2025.
- This may be because of a Google update or a loss of backlinks.
- In 2026, keywords slowly grew again to about 25-30. This shows that content improvements started to work.
- The numbers have dropped a little since mid-2026, so the site needs steady work to keep its rankings.

Please Note:
The data presented in this SEO audit is subject to change over time due to evolving search engine algorithms, website updates, and external market dynamics

ORGANIC KEYWORDS ANALYSIS : 2/4

Top Organic Keywords 3

Keyword	Intent	Pos.	Volume	CPC (U...	Traffic
fambo	N	1	1.3K	0.00	95.58
fambo	N		1.3K	0.00	3.67
fambo	N		1.3K	0.00	0.36
fambo	N		1.3K	0.00	0.36
fasbo	I	50	140	0.00	0.00

Source: Semrush

INSIGHTS

- The site ranks for only 3 organic keywords.
- Almost all of them are the brand name "fambo".
- "fambo" has a volume of 1.3K and ranks in position 1. It brings about 95.58 traffic, which is almost all of the traffic.
- The same keyword in SERP features brings very little traffic (3.67 and 0.36).
- "fasbo" (a spelling mistake) is in position 50 with a volume of 140, so it brings no traffic.
- CPC is 0.00 for all keywords, so these brand searches have no ad cost value.
- People find the site mostly when they already know the brand.
- There are no keywords for products or services yet. New pages for fresh vegetables, cut vegetables, frozen items and sauces can bring in new visitors.

Please Note:
The data presented in this SEO audit is subject to change over time due to evolving search engine algorithms, website updates, and external market dynamics

ORGANIC KEYWORD ANALYSIS : 3/4

Keywords by Intent

Intent		Keywords	Traffic
Informational	33.3%	2	0
Navigational	66.7%	4	1.1K

Source: Semrush

INSIGHTS

- The site has 6 organic keywords in total.
- 66.7% (4 keywords) are navigational, which means people search for the brand name.
- These 4 keywords bring about 1.1K traffic, almost all of the site's traffic.
- 33.3% (2 keywords) are informational, but they bring 0 traffic.
- People find the site mostly when they already know the brand.
- The site has no content that brings in new visitors who are looking for information.
- Blogs and guides on fresh produce for restaurants can help bring in new visitors.

Please Note:
The data presented in this SEO audit is subject to change over time due to evolving search engine algorithms, website updates, and external market dynamics

ORGANIC KEYWORD ANALYSIS : 4/4

Main Organic Competitors 17

Competitor	Com. Level	Com. Keywor...	SE Keywords
wmsfambo.in		1	2
glassdoor.co.in		1	961,867
zaubacorp.com		1	796,416
spotify.com		1	2,102,147
ambitionbox.com		1	920,938

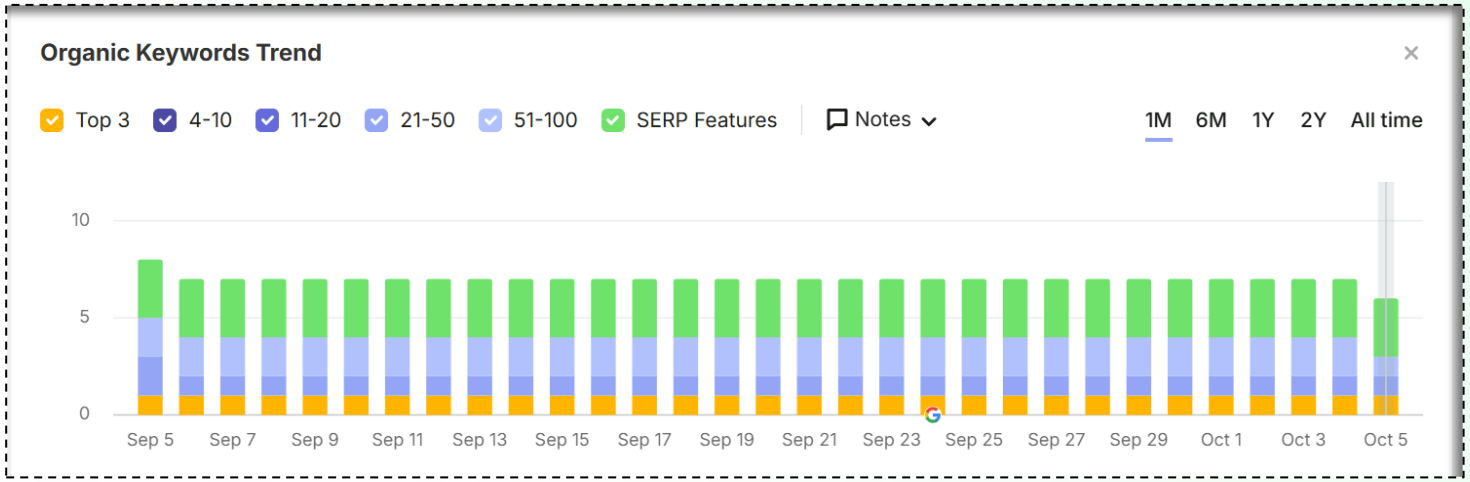

Source: Semrush

INSIGHTS

- Semrush shows 17 organic competitors, and the table lists the top 5.
- Each competitor shares only 1 keyword with the site, so the overlap is very low.
- Glassdoor, Zaubacorp, Spotify and AmbitionBox are big websites, with 796K to 2.1M keywords each.
- They are not real food supply competitors. They show up only because of the brand name "fambo".
- wmsfambo.in has a similar name and only 2 keywords.
- The site does not rank for product keywords, so it has no real competitors in search yet.
- Fambo can find true competitors, like other B2B fresh produce suppliers, and learn from their keywords.
- New pages for products and customer types can help the site compete for these keywords.

Please Note:
The data presented in this SEO audit is subject to change over time due to evolving search engine algorithms, website updates, and external market dynamics

KEYWORD ORGANIC TREND

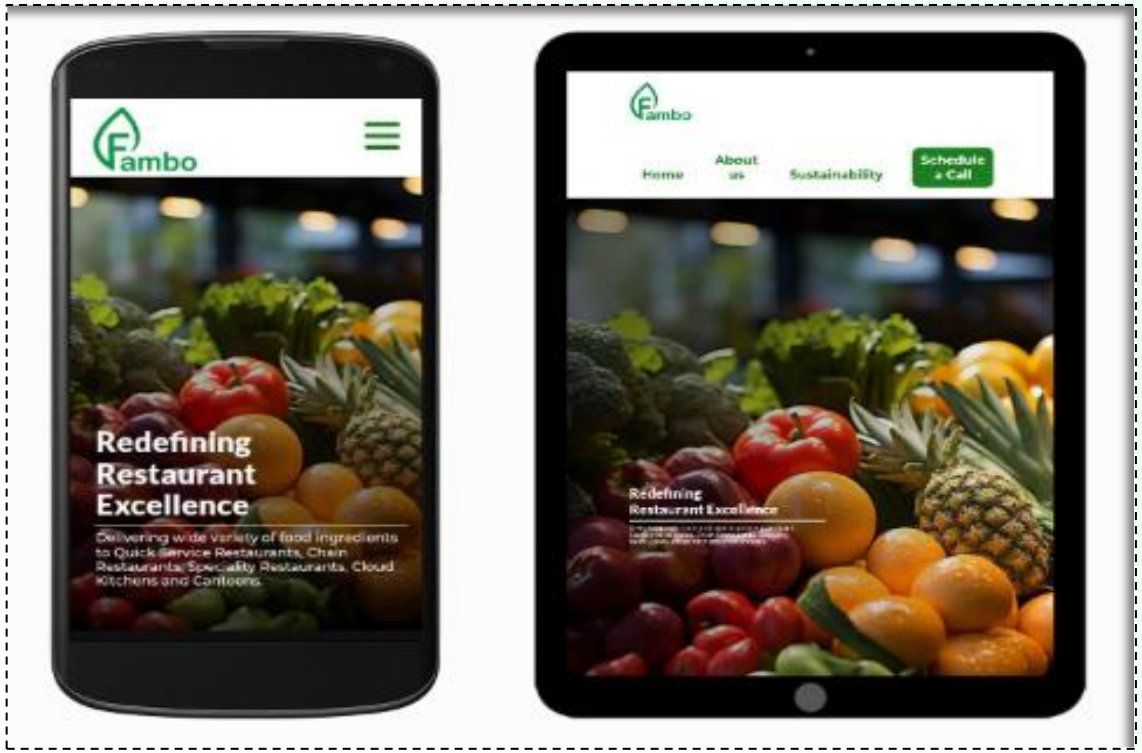

Source: Semrush

INSIGHTS

- The site had about 7 organic keywords each day from Sep 5 to Oct 5.
- The trend was very steady, with no big rise or fall.
- Only a small part of the keywords are in the Top 3.
- Most keywords are in positions 4-100, where very few people click.
- A good share of keywords show up in SERP features (the green part).
- The count is small because Fambo is a B2B food supplier and its website has few pages.
- New pages for products (like cut vegetables, frozen items and sauces) and customer types (like QSR and cloud kitchens) can bring in more keywords.

Please Note:
The data presented in this SEO audit is subject to change over time due to evolving search engine algorithms, website updates, and external market dynamics

PAGE RENDERING CHECK

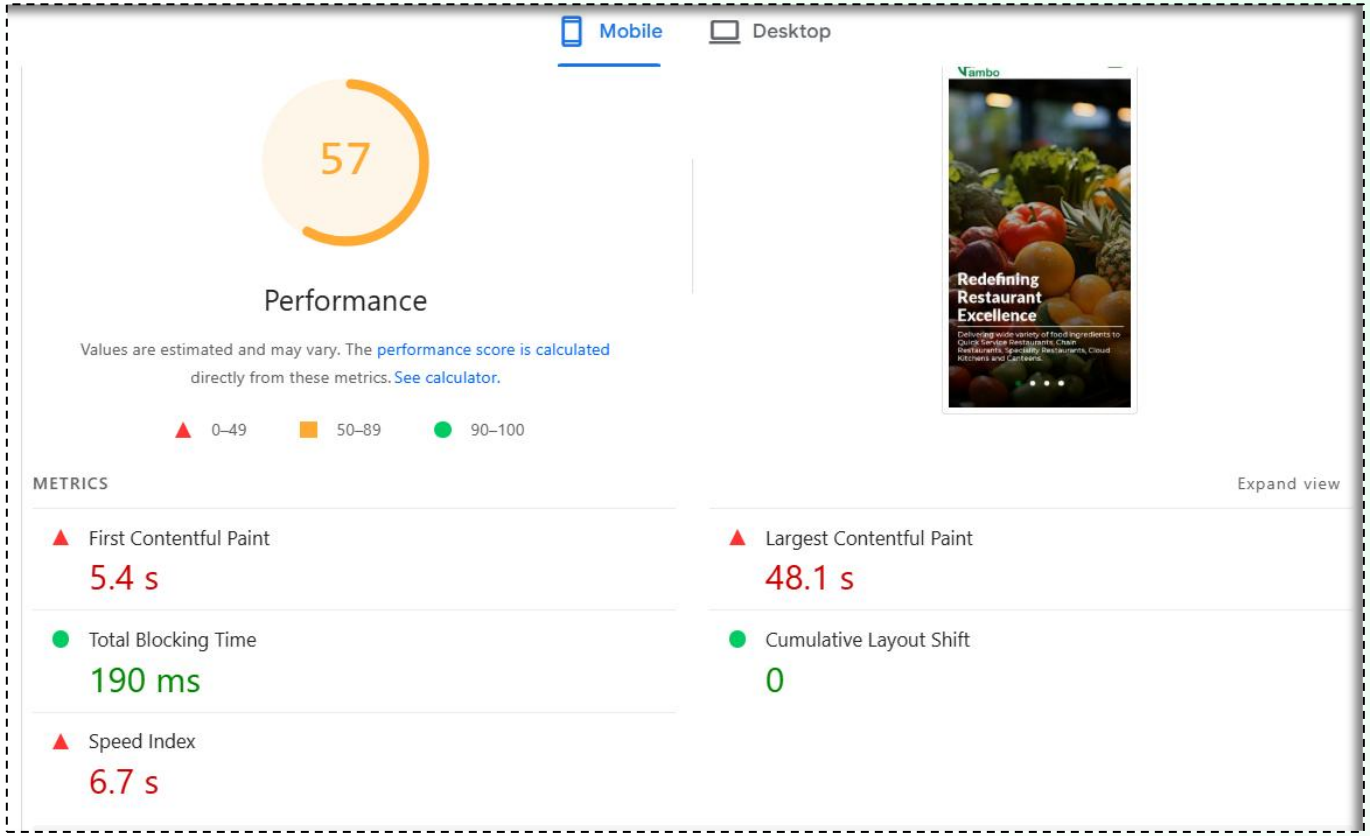

Source:SEOptimer

INSIGHTS

- The website is **responsive** across mobile and tablet devices.
- Content, images, and navigation are displayed properly on different screen sizes.
- The layout remains **visually consistent and user-friendly.**
- No major rendering or alignment issues are visible in the tested views.
- Responsive design supports a **better user experience across devices**.

Please Note:
The data presented in this SEO audit is subject to change over time due to evolving search engine algorithms, website updates, and external market dynamics

PAGE SPEED CHECK MOBILE

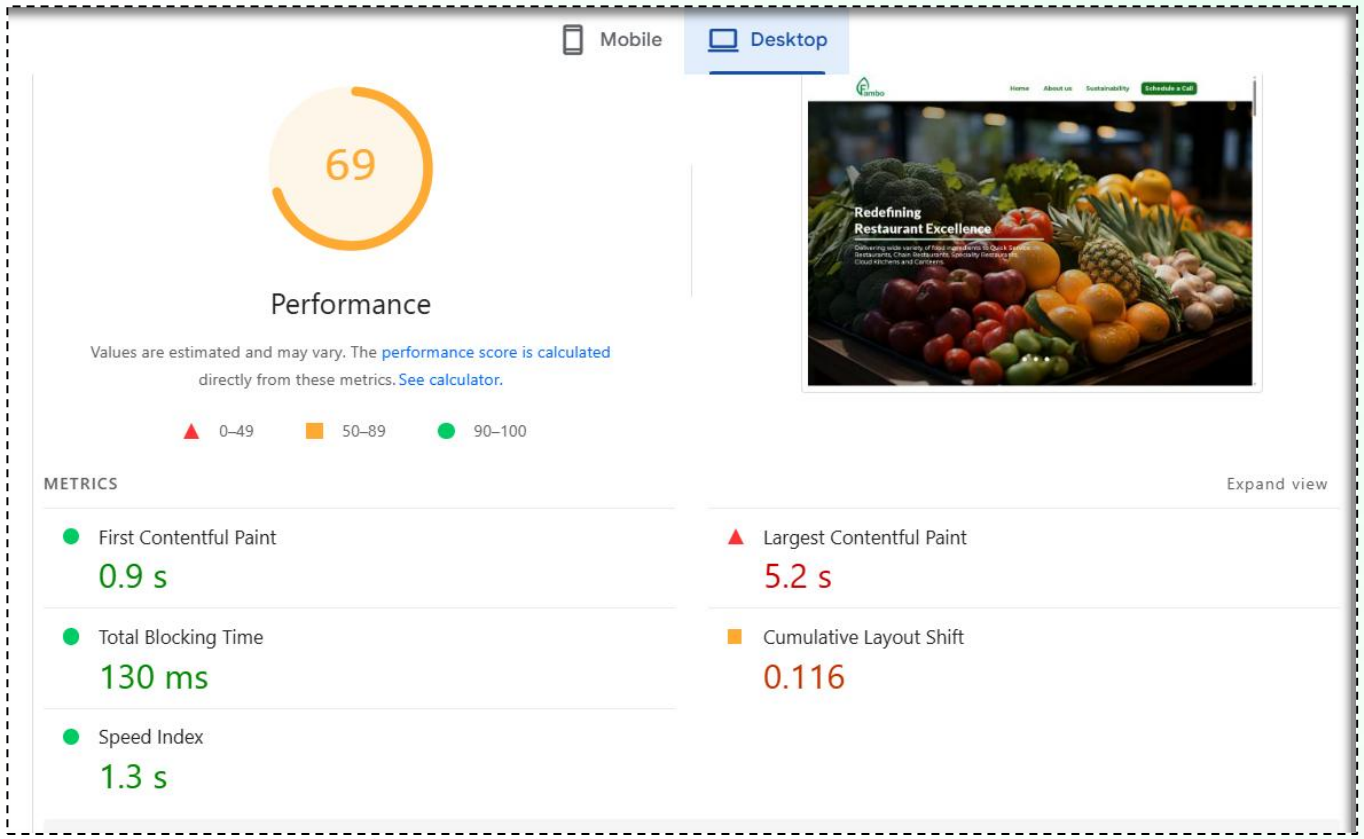

Source:SEOptimer

INSIGHTS

- The **mobile PageSpeed score is 57**, indicating moderate performance.
- **First Contentful Paint:** 5.4 s — needs improvement.
- **Total Blocking Time:** 190 ms — relatively good.
- **Speed Index:** 6.7 s — indicates slower visual loading.
- **Largest Contentful Paint:** 48.1 s — **significant performance issue** and the main area for improvement.
- **Cumulative Layout Shift:** 0 — excellent visual stability.
- Overall, **mobile performance needs optimization**, particularly for faster content and image loading.

Please Note:
The data presented in this SEO audit is subject to change over time due to evolving search engine algorithms, website updates, and external market dynamics

PAGE SPEED CHEC DESKTOP

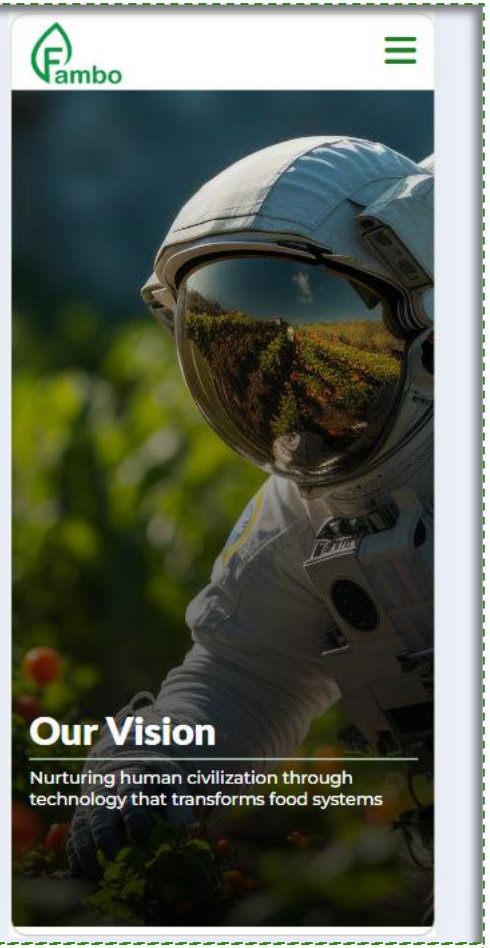

Source:SEOptimer

Please Note:
The data presented in this SEO audit is subject to change over time due to evolving search engine algorithms, website updates, and external market dynamics

INSIGHTS

- The **desktop PageSpeed score is 69**, indicating moderate performance.
- **First Contentful Paint:** 0.9 s — good.
- **Total Blocking Time:** 130 ms — good.
- **Speed Index:** 1.3 s — good.
- **Largest Contentful Paint:** 5.2 s — needs improvement.
- **Cumulative Layout Shift:** 0.116 — slightly needs improvement.
- Overall, **desktop performance is fairly good**, but LCP and layout stability can be optimized.

MOBILE FRIENDLINESS TEST

Iphone 16 Pro Max (440*956)

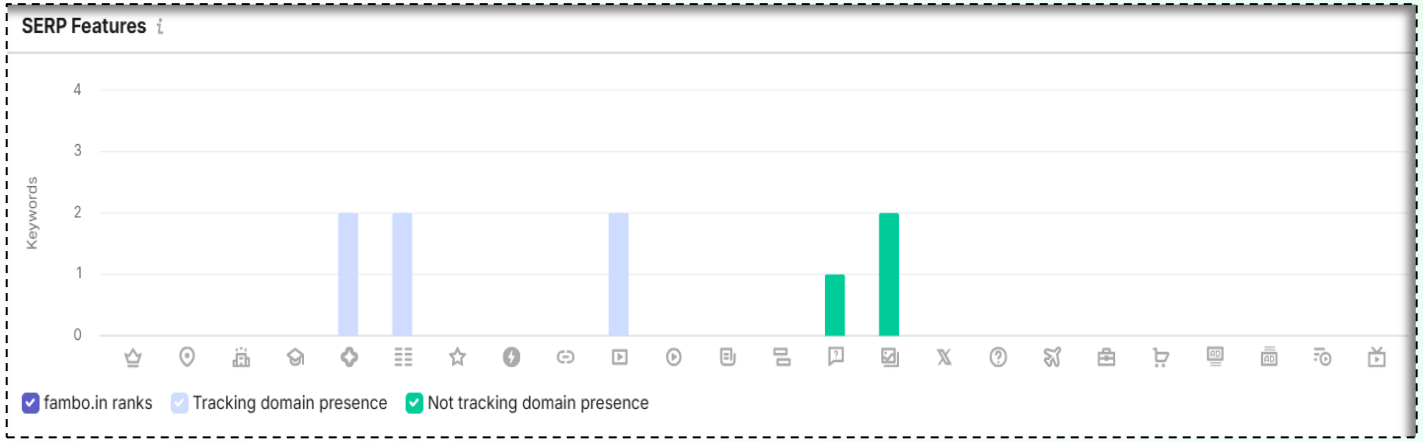

Samsung Galaxy A55 (360*800)

INSIGHTS

- The website was tested on **iPhone 16 Pro Max (440 × 956)** and **Samsung Galaxy A55 (360 × 800).**
- The layout adapts properly to both screen sizes.
- Images, text, and navigation remain clearly visible on both devices.
- No major **overlapping, clipping, or alignment issues** were observed.

Source: Fambo.in

WEBSITE SERP FEATURE ANALYSIS

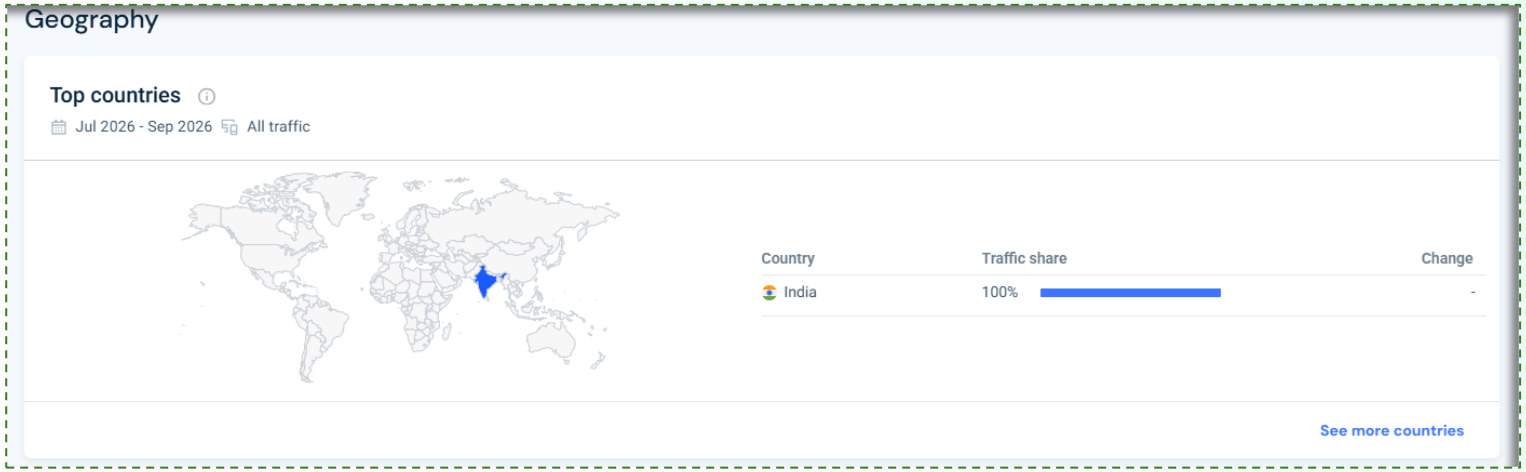

Source: Semrush

INSIGHTS

- The site appears in only a few SERP features.
- Each feature has only 1 to 2 keywords.
- 3 features have light blue bars, where the domain is tracked and shown as the site's own presence.
- 2 features have green bars, where the domain is not tracked.
- Most other SERP features have no bars at all.
- This means the site is not using most chances to stand out in search results.
- Adding FAQ schema, helpful blog content and images or videos can help the site show up in more features.

Please Note:
The data presented in this SEO audit is subject to change over time due to evolving search engine algorithms, website updates, and external market dynamics

GEO DISTRIBUTION ANALYSIS

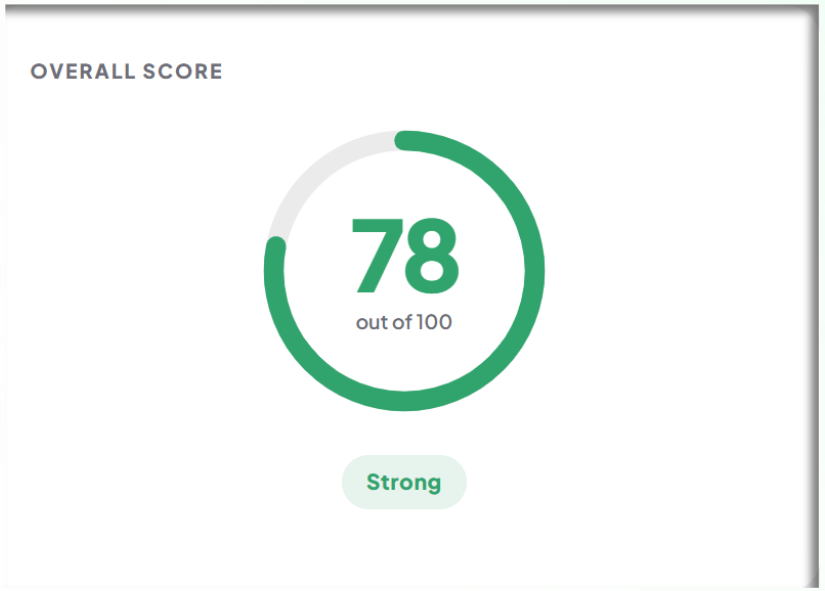

Source:similarweb

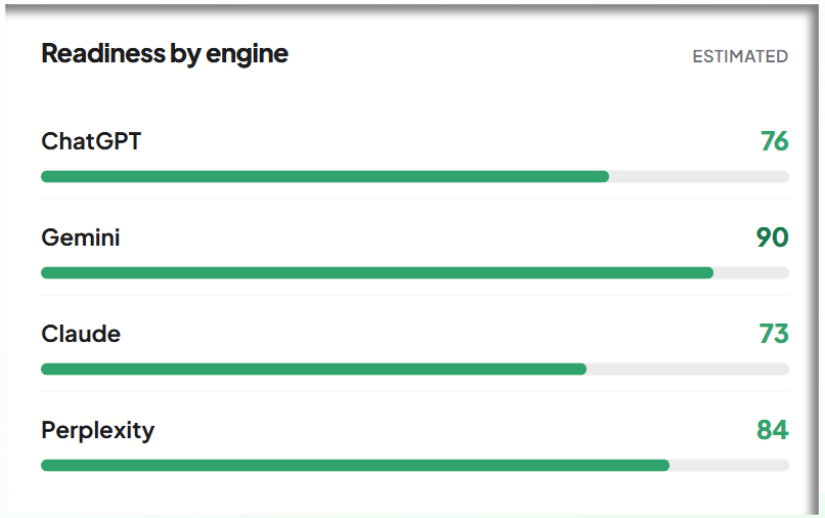

INSIGHTS

- All of the site's traffic (100%) comes from India. The map shows only India highlighted.
- The data covers July 2026 to September 2026 and includes all traffic.
- The site has no visitors from other countries yet, so it depends fully on the Indian market.
- This is good if the business only serves India. If it wants to grow, it could try reaching other countries too.

Please Note:
The data presented in this SEO audit is subject to change over time due to evolving search engine algorithms, website updates, and external market dynamics

AI VISIBILITY ANALYSIS

Source: arobis.ai

https://fambo.in/

INSIGHTS

- **Overall AI Visibility Score:** Fambo scored **78/100**, indicating strong AI visibility.
- **ChatGPT:** 76 — Good opportunity to improve brand mentions in AI-generated answers.
- **Gemini:** 90 — Strong visibility across AI-generated responses.
- **Claude:** 75 — Scope to improve brand recognition and relevant mentions.
- **Perplexity:** 84 — Good visibility, with opportunities for further improvement.

Please Note:
The data presented in this SEO audit is subject to change over time due to evolving search engine algorithms, website updates, and external market dynamics

Source:sitemap.xml

Please Note:
The data presented in this SEO audit is subject to change over time due to evolving search engine algorithms, website updates, and external market dynamics

INSIGHTS

- **XML Sitemap Available:** Fambo has an XML sitemap that lists important website URLs.
- **Key Pages Included:** Homepage, About Us, Case Study, and Sustainability pages are included.
- **Crawlability:** The sitemap helps search engines discover and crawl important website pages.
- **Priority Settings:** Different priority values are assigned to the listed URLs.
- **Last Modified Dates:** The sitemap includes last-modified information for URLs.

IMPROVEMENT RECOMMENDATIONS

Fambo IMPROVEMENT RECOMMENDATIONS

META TITLE TAG	**The site has a title tag, but it is too long. It should be shortened to between 50 and 60 characters (including spaces). Length: 64. For example: "Fambo | Fresh Vegetables & Food Supplier for Restaurants" (about 56 characters).**
META DESCRIPTION	**The page has a meta description tag, but it is too long. It should be between 120 and 160 characters (including spaces). Length: about 214. It should be shortened and should include a main keyword, like "fresh vegetables supplier for restaurants".**
HEADER TAG (H1)	**The home page headings look like H2 and H3 tags, and I could not see a clear H1. It is recommended to use only one H1 tag on a page, with the main keyword in it. For example: "Fresh Vegetables & Food Supplier for Restaurants".**

Source:SEOptimer

KEYWORD USAGE	**The site's main keywords, like "fresh vegetables supplier" and "wholesale produce", are only in the meta keywords tag, which Google ignores. They should be used in the page text, headings and image alt text.**
PRODUCT AND SERVICE PAGES	**The site has only 3 pages (Home, About Us, Sustainability). Separate pages should be made for products (cut vegetables, frozen items, sauces, spices, bakery) and for customer types (QSR, cloud kitchens, canteens).**
CONTENT AND BLOG	**The site has only one case study and no blog. More case studies and helpful blog posts can bring new visitors who do not know the brand.**

Source:SEOptimer

SPELLING MISTAKES	**The home page has spelling mistakes, like "fabolous", "incoporate" and "tracability". These should be fixed to look more professional.**
MOBILE SETTINGS	**The mobile viewport setting stops users from zooming (user-scalable=no). This should be removed for better accessibility.**
STRUCTURED DATA	**The FAQ section has good answers, but no FAQ schema was seen. Adding it can help the answers show up in search results.**

Source:SEOptimer

BACKLINKS	**The site should get backlinks from food industry websites, supplier directories and news sites to build authority.**
PAGE SPEED	**The home page has many big images (sliders and logos in different formats). Compress them and use modern formats like WebP or AVIF, so the page loads faster on mobile.**
CONTENT REFRESH	**Add the date and update key pages often. Add short videos or photos of the processing center and farms to show how Fambo works, which helps visitors stay longer.**

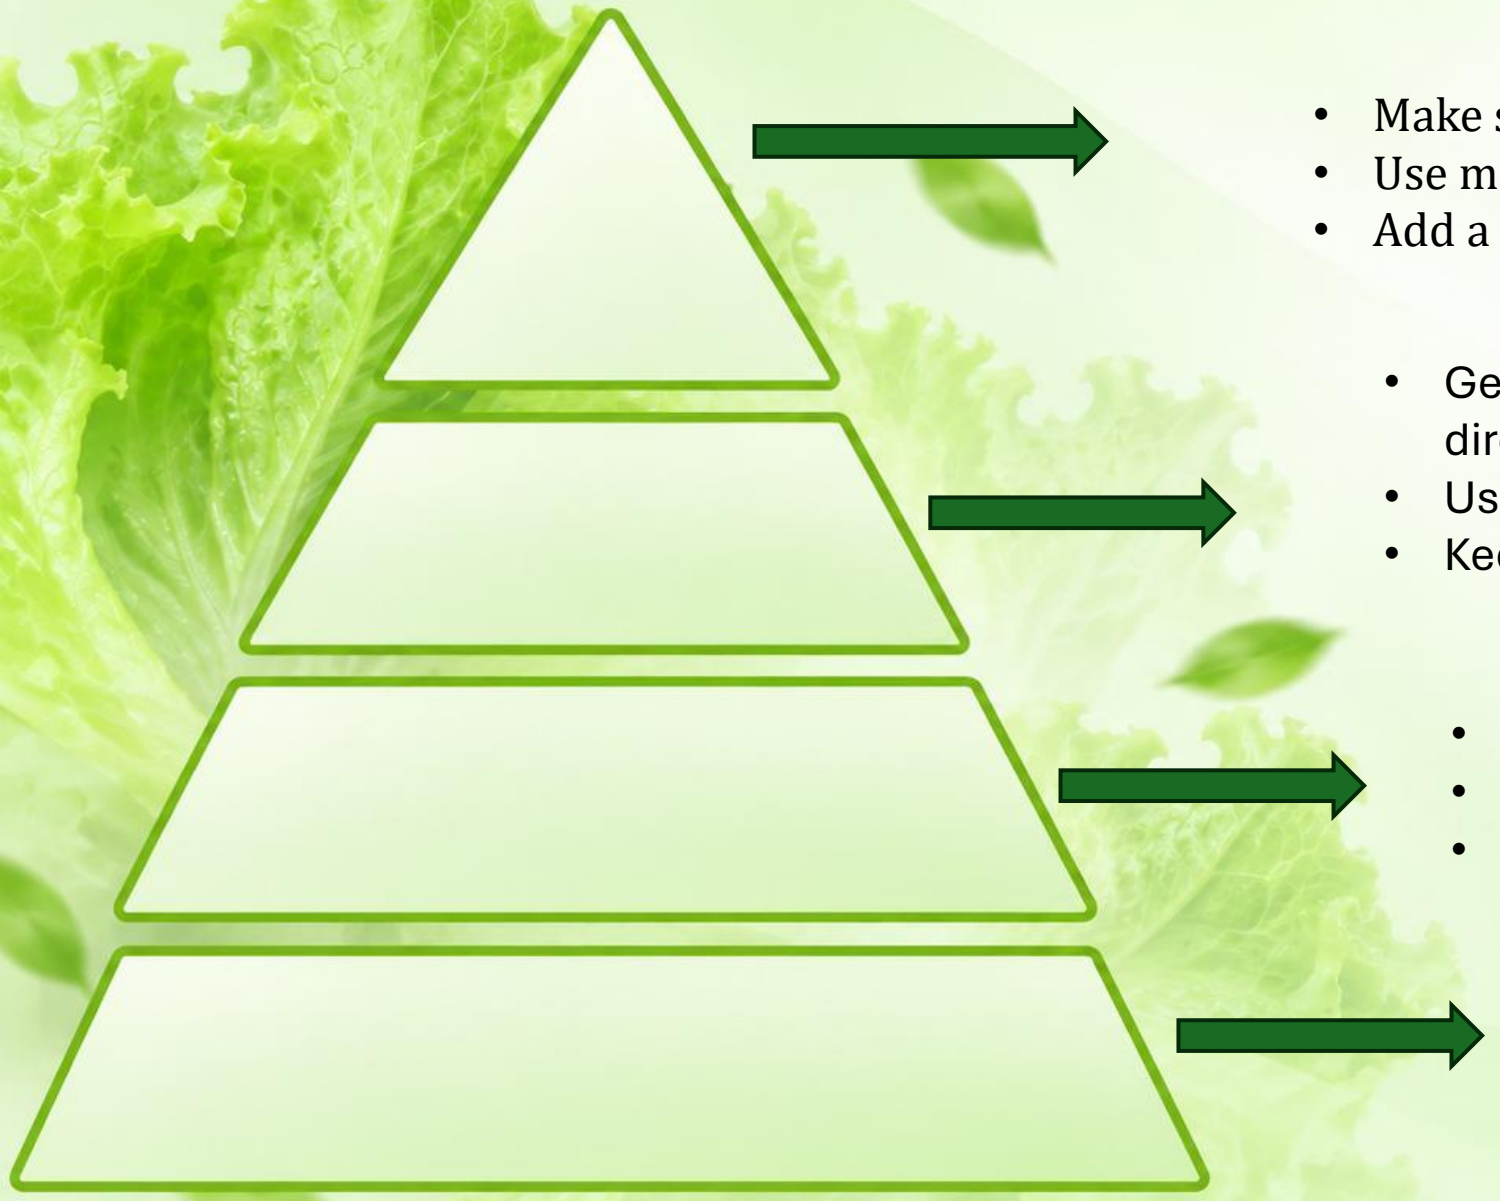

Source:SEOptimer

Please Note:
The data presented in this SEO audit is subject to change overtime due to evolving search engine algorithms, website updates, and external market dynamics

SUGGESTIVE KEY IMPROVEMENT AREAS

- To improve website performance and SEO it is important to reduce the page file size. The home page has large images, such as the slider pictures and customer logos. Compressing them and using formats like WebP will make the page load faster. Adding a robots.txt file and an XML sitemap will also help search engines crawl and index the site effectively.
- Additionally enhancing on-page SEO by shortening the title tag (64 characters) to 50-60 characters and the meta description to 120-160 characters will make them more readable. Adding one H1 tag with the main keyword adding alt text to all images and using clean URLs will improve user experience and search visibility. Main keywords like " vegetables supplier for restaurants" should also be used in the page text, not only in the meta keywords tag.
- To boost SEO and usability increase the page text by making pages for products (cut vegetables, frozen items, sauces) and customer types (QSR, cloud kitchens, canteens). Add FAQ schema to the FAQ section. Add local business schema with the Noida office and the Delhi-NCR areas served. Also remove "user-scalable=no" from the settings and fix spelling mistakes like "fabolous" "incoporate" and "tracability" to improve the mobile and desktop experience.
- Enhance sharing and tracking by adding Open Graph tags and X Cards so the website looks good when shared on LinkedIn, Facebook and X. The site already uses Google Tag Manager so set up goals, for form submissions calls and email clicks. Replace the text email (sales@fambo.in) with a contact form to reduce spam risk.

4 PILLARS OF SEO

CONTENT CREATION & ENHANCEMENT

- Make separate pages for products and customer types
- Use main keywords in headings and page text
- Add a blog and more case studies

BACKLINK STRATEGY

- Get links from food industry sites and supplier directories
- Use partner and case study pages to earn links
- Keep the link profile natural

CRO & USER EXPERIENCE

- Add a contact form and "Request a Quote“ button
- Compress images for faster loading
- Fix mobile zoom and spelling mistakes

ANALYTICS & OPTIMIZATION

- Set up goals for forms, calls and emails
- Track brand and non-brand keywords separately
- Check bounce rate and improve weak pages

SEO PLAN SUMMARY ACTIVITIES

KEYWORD STRATEGY :

Conduct in-depth keyword research to identify high-intent and long-tail keywords related to fresh produce, vegetables, fruits, restaurant suppliers, and QSR food supply.

ON-PAGE SEO :

Optimize meta titles, descriptions, URLs, headings, internal links, images, and structured data for better search visibility.

TECHNICAL SEO:

Improve website performance by optimizing loading speed, mobile responsiveness, Core Web Vitals, broken links, XML sitemap, and crawlability.

BACKLINK ACQUISITION:

Earn authoritative backlinks through digital PR, food-industry websites, business directories, guest posts, and relevant partnerships.

GOOGLE BUSINESS PROFILE OPTIMIZATION:

Optimize Google Business Profile and relevant local listings to improve Fambo's local search visibility.

SEO PLAN SUMMARY ACTIVITIES

CONTENT MARKETING:

Create SEO-focused blogs, product content, FAQs, industry guides, and case studies targeting restaurants, QSRs, cloud kitchens, and food-service businesses.

PRODUCT PAGE OPTIMIZATION:

Optimize product and service pages with relevant keywords, informative content, internal links, images, and structured data.

SOCIAL MEDIA INTEGRATION:

Share and promote website content across social platforms, collaborate with relevant influencers, and encourage user-generated content for wider reach.

PERFORMANCE MONITORING:

Track keyword rankings, organic traffic, search visibility, CTR, backlinks, and overall website performance using analytics and SEO tools.

CONTINUOUS OPTIMIZATION:

Regularly update content, improve underperforming pages, refine keyword targeting, and make data-driven SEO improvements.

TARGET LOCATION : 1/2

Target Location Strategy

- Delhi-NCR (Delhi, Noida, Gurgaon, Ghaziabad and Faridabad), where Fambo delivers today
- Noida, where the corporate office is, as the main base
- Areas with many restaurants, QSR outlets, cloud kitchens, hotels and corporate canteens
- High-demand zones with many food businesses close together, like business hubs and food streets
- All of India for brand searches, since 100% of the site's traffic comes from India

TARGET LOCATION EXPANSION STRATEGY 2/2

WHAT THEY'RE DOING	WHAT CAN IMPROVE
Already active in Delhi-NCR (Delhi, Noida, Gurgaon, Ghaziabad and Faridabad).	Expand into other big food hubs like Mumbai, Bengaluru, Hyderabad and Pune, where many restaurant chains operate.
Serves restaurant chains, QSR outlets, cloud kitchens, hotels, canteens and airline catering, with Noida as the base.	Enter new cities where current customers (like Burger King and McDonald's) already have outlets, so demand is ready.
Gets fresh produce directly from farms and sends it to its own processing centers.	Open collection centers and hubs near farm regions and city outskirts, for better logistics and lower cost.
Delivers in temperature-controlled vehicles with GPS tracking.	Add cold chain delivery in every new city, and make a city page and Google Business Profile for each one.

TARGET AUDIENCE

AUDIENCE	DETAILS
Restaurant Chains & QSR	❑ Owners and procurement heads of burger, pizza, rolls and Chinese chains (like Burger King, McDonald's and Burger Singh) ❑ Need fresh vegetables with the same quality and on-time delivery every day ❑ Want clear prices, full traceability and food safety certificates (GAP, NSF, FSSAI) ❑ Mainly in Delhi-NCR; more cities in future
Cloud Kitchens & Specially Restaurants	❑ Owners and kitchen managers of delivery-only and Specially restaurants ❑ Need ready-to-use items, like cut vegetables, sauces, gravies and fried items ❑ Want to save kitchen time and food cost ❑ Often buying now from local mandi or vendors, so they are open to a better option

Hotels, Caterers & Canteens	❑ Hotels, airline caterers, corporate canteens and hospital kitchens ❑ Buy in large amounts and need steady supply all year ❑ Need clean packing, hygiene and quick problem solving ❑ Value one supplier for many products (fresh, frozen and packed)
E-Grocery & Modern Trade	❑ Quick commerce and online grocery platforms (like Zepto) and modern retail stores ❑ Need fresh fruits and vegetables in large amounts at fast speed ❑ Want sorting, grading and packing done at the source ❑ Depend on on-time delivery and consistent quality
Hospitals & Healthcare Food Services	❑ Hospital kitchens and institutional food-service operations ❑ Require hygienically handled ingredients and dependable supply ❑ Food safety and clean processing are particularly important ❑ May need fresh, processed and easy-to-use ingredients ❑ Fambo includes hospitals within its “Food Away From Home” customer categories.

Food Processing & Ready-to-Eat Brands	❑ ompanies that make sauces, pickles, frozen meals and packed food ❑ Need a steady supply of raw fruits, vegetables and spices ❑ Want sorted and graded produce with full traceability
Supermarkets & Retail Chains	❑ Modern trade stores and grocery chains ❑ Need fresh produce in large amounts, packed and graded ❑ Depend on on-time delivery to keep shelves full
Farmers & Growers (supply side)	❑ GAP-certified farmers and partner farms who sell to Fambo ❑ Look for a trusted buyer with fair prices and direct payment ❑ Can be reached through a “Partner with Us” page

TOTAL ADDRESSABLE MARKET (FUNNEL): 1/3

TAM (Total Addressable Market)

The total demand for food ingredients (fresh produce, cut vegetables, sauces, frozen and fried items) from all food service businesses in India. This is the revenue if Fambo could capture everything.

SAM (Serviceable Available Market)

The part of TAM that Fambo can realistically serve, given its customer types (QSR chains, cloud kitchens, hotels, canteens), regions and current capacity.

SOM (Serviceable Obtainable Market)

The part of SAM that Fambo can expect to win in 3-5 years with a realistic go-to-market plan.

TOTAL ADDRESSABLE MARKET (FUNNEL): 2/3

TAM (Total Addressable Market) :

USD 22-27 billion (about ₹1,85,000-2,30,000 crore) per annum

- ❑ India's food service market is estimated at USD 78 billion in 2025.
- ❑ Food cost should ideally be 28-35% of revenue for most Indian restaurants.
- ❑ Calculation: USD 78 billion × 28-35% = USD 22-27 billion of ingredient demand across all restaurants, hotels, caterers and canteens.

SAM (Serviceable Available Market) :

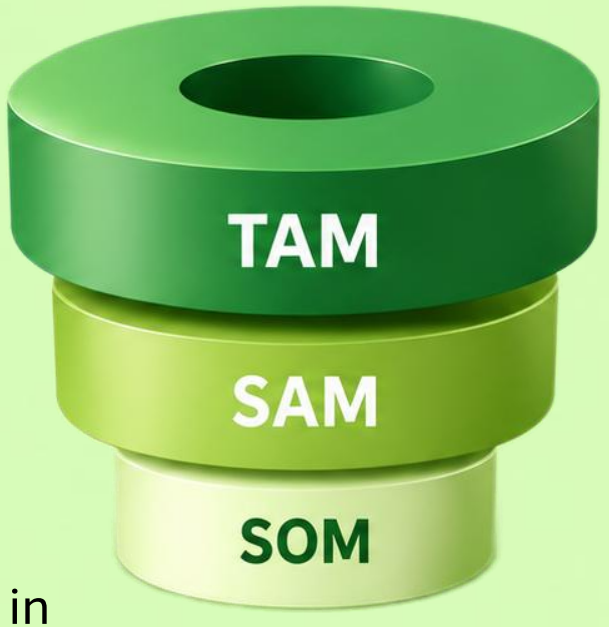

- ❑ **USD 2.7-3.3 billion (about ₹23,000-28,000 crore) per annum**
- ❑ Fambo serves organised buyers (QSR chains, cloud kitchens, hotels, canteens), mainly in North and Central India.
- ❑ Calculation: TAM × 35% (organised buyers) × 35% (North and Central India) = about 12% of TAM.
- ❑ The 35% filters are assumptions.

TOTAL ADDRESSABLE MARKET (FUNNEL): 3/3

SOM (Serviceable Obtainable Market)

USD 23-47 million (about ₹200-400 crore) in 3-5 years

- Fambo expects to reach ₹50 crore annual recurring revenue by the second half of FY26.
- Calculation: ₹50 crore × 4-8 times growth over 3-5 years = ₹200-400 crore, which is about 1-1.5% of SAM.
- It needs more outlets, new cities, more value-added products (cut, frozen, sauces) and strong logistics.
- The 4-8 times growth is an assumption.

MARKET CONTEXT

- The food service market is expected to cross USD 125 billion by 2030, and the organised segment will drive over 60% of the growth.
- Food services are only 1.9% of India's GDP, compared with 5% in China and 6% in Brazil. Fambo reported ₹20.3 crore revenue in FY25 and serves over 1,000 outlets in North and Central India.
- It plans to use its new funds to expand into western and southern regions.
- Its competitors include WayCool Foods, FreshToHome (B2B) and Ninjacart.

MICRO FUNNEL BREAKDOWN

Metric	Example Scenario	Numbers / Assumptions
Total food businesses in target region	Suppose there are about 100,000 organised food outlets (QSR, cloud kitchens, hotels, canteens) in North and Central India.	100,000 outlets (assumption)
Reachable audience via marketing / sales	Suppose SEO, LinkedIn, B2B outreach and the sales team can reach 20% of these outlets.	20,000 outlets (assumption)
Conversion rate	5% become customers in Year 1, which matches the 1,000+ outlets Fambo serves.	1,000 outlets

MICRO FUNNEL BREAKDOWN

Average revenue per outlet	Fambo targets ₹50 crore annual recurring revenue. Divided by 1,000 outlets, this is about ₹42,000 per month.	₹5 lakh (about USD 5,900) per year
Year-1 revenue	1,000 outlets × ₹5 lakh	About ₹50 crore
Outlets needed for SOM (3-5 years)	To reach the SOM of ₹200-400 crore at the same revenue per outlet.	4,000-8,000 outlets

COMPETITOR ANALYSIS

Stay Ahead. Serve Better.

ninjacart | WayCool | Fresh to home | Hyperpure by ZOMATO | HOREKA 360 by Udaan

01

Identify Key Competitors

- Analyse leading online fresh food suppliers in terms of product range, pricing, distribution and marketing.

02

Understand Their Strategy

- Study their positioning, promotions and partnerships.
- Analyse customer engagement and distribution tactics.

03

Spot Opportunities

- Identify gaps in the market and areas where Fambo can differentiate.
- Explore new product categories and target segments.

04

Stay Ahead

- Use competitor insights to refine product offerings.
- Improve customer experience and strengthen our market position.

COMPETITOR ANALYSIS : 1/5

ninjacart

MARKET REACH	Moves over 1,500 tonnes of fresh produce a day across 40+ cities, working with 150,000+ farmers and 30,000+ retailers. It supplies e-commerce companies, hotels and restaurants.
BRAND PERCEPTION	Seen as India's largest B2B fresh produce platform. Walmart and Flipkart invested in it, which adds trust with large buyers.
TARGET KEYWORDS	Fresh produce and B2B terms such as "fresh vegetables supplier", "fruits and vegetables wholesale" and "buy produce online for business".
KEY STRENGTH	It calls itself the largest fresh produce supplier to quick commerce, with a portfolio of 150+ products. It is also EBITDA profitable and preparing for an IPO within two years.
KEY WEAKNESS	Revenue fell to ₹1,634 crore in FY25 from ₹2,007 crore, and the loss was about ₹256 crore. Its focus on quick commerce and big retail may give smaller restaurant chains less personal service.

COMPETITOR ANALYSIS : 2/5

waycool

MARKET REACH	Serves around 100,000 customers across retail, hotels, restaurants and modern trade, and works with more than 150,000 farmers.
BRAND PERCEPTION	Describes itself as India's largest agri-commerce company. In 2024 it laid off over 200 employees to move toward profitability, which may hurt how buyers see its stability.
TARGET KEYWORDS	Fresh produce supplier, fresh vegetables supplier, fruits and vegetables wholesale, B2B food supplier, wholesale fruits supplier, vegetable supplier for restaurants, agricultural supply chain, food distribution services, farm-to-business supply chain, and bulk food supplier.
KEY STRENGTH	A wide range, from fresh produce and staples to dairy, value-added foods and private labelling. Its hotel and restaurant customers include Taj Hotels.
KEY WEAKNESS	FY23 loss of ₹685 crore on ₹1,251 crore revenue, and debt at an 18% interest rate, which signals money pressure.

COMPETITOR ANALYSIS : 3/5

Fambo

Fresh to home

MARKET REACH	Operates in around 160 cities in India and has a presence in the UAE. It entered quick commerce, with deliveries in 10-15 minutes.
BRAND PERCEPTION	Seen as India's leading direct-to-consumer meat and seafood delivery platform. It is known for fresh, traceable products, and it is a consumer brand, not a restaurant supplier.
TARGET KEYWORDS	Consumer terms like "buy fish online", "fresh chicken online" and "meat delivery". It is unlikely to target "fresh vegetables supplier for restaurants".
KEY STRENGTH	Revenue grew 14% to ₹421 crore in FY25, and it has raised over $320 million. It sources from over 4,000 fishers and farmers and offers 2,000+ certified products (2023 reporting).
KEY WEAKNESS	Net loss of ₹146 crore in FY25, almost unchanged from ₹150 crore the year before. It is also raising ₹75 crore in debt for working capital. Its focus is meat and seafood, not vegetables or restaurant kitchens

COMPETITOR ANALYSIS : 4/5

hyperpure BY ZOMATO

MARKET REACH	The B2B arm of Eternal (the parent of Zomato and Blinkit). It supplies fresh produce, meats and kitchen supplies directly to partner restaurants.
BRAND PERCEPTION	Backed by the Zomato brand, which restaurants already know and use. This is Fambo's closest direct competitor, because it sells to the same restaurant buyers.
TARGET KEYWORDS	Restaurant supply terms like "restaurant raw material supplier", "kitchen supplies for restaurants" and "farm to fork supplies".
KEY STRENGTH	B2B supplies revenue grew 95% to ₹6,196 crore in FY25. The parent company is profitable, with a profit after tax of ₹527 crore.
KEY WEAKNESS	It is one part of a very large group, so restaurants may get less personal service. Restaurants that compete with Zomato may also prefer a neutral supplier.

COMPETITOR ANALYSIS : 5/5

horeca360 by udaan

MARKET REACH	horeca360 is currently available only in Bangalore, with more cities "coming soon". Its parent, Udaan, claims daily delivery across over 1,000 cities and 12,500 pin codes.
BRAND PERCEPTION	Positions itself as a trusted sourcing partner for hotels, restaurants and cloud kitchens. Udaan calls itself India's largest B2B e-commerce platform, with about 70% market share (its own claim).
TARGET KEYWORDS	HoReCa sourcing terms like "restaurant sourcing", "cloud kitchen supplies", "hotel supplies" and "bulk food supply".
KEY STRENGTH	Over 1,000 products across fresh produce, meat and seafood, dairy, bakery, staples and disposables. It offers daily early-morning delivery, credit options, dedicated relationship managers and free sign-up.
KEY WEAKNESS	Udaan's FY24 revenue was flat at ₹5,707 crore with a net loss of ₹1,674 crore. FY25 numbers are not disclosed yet. The Udaan brand sells many categories, so HoReCa is only one focus.

BLOG / INFORMATIONAL

1. How to choose a fresh produce supplier for your restaurant
2. Mandi vs direct farm sourcing: which is more cost effective?
3. What is **GAP** certification and why it matters for food safety
4. Benefits of cut and chopped vegetables for QSR kitchens
5. How cloud kitchens can reduce food cost and wastage
6. Fresh vs frozen vegetables for restaurants

Home Page

Broad, high-volume keywords (commercial + transactional mix).

Product Pages

Transactional keywords (specific products + "supplier / wholesale / bulk").

Blog Page

Informational keywords (guides, comparisons, how-to content).

DIGITAL STRATEGY/ROADMAP

Months 1–2

Focus on SEO optimization (title tags, meta descriptions, headings and image alt text), brand awareness and lead generation through Google Ads, LinkedIn Ads and Meta Ads. Publish SEO content targeting B2B keywords such as “vegetable supplier for restaurants” and “bulk vegetable supplier Delhi NCR”. Launch awareness campaigns on freshness, certified quality and on-time delivery.

Months 3–4

Expand into remarketing, launch a blog and knowledge hub on kitchen procurement, food safety and ready-to-use ingredients, and publish case studies and customer testimonials. Run LinkedIn and Instagram campaigns. Engage restaurant owners, chefs and procurement managers through short videos, chef collaborations and SEO blog expansion targeting informational and commercial keywords.

Months 5–6

Scale lead nurturing with email and WhatsApp automation for restaurant, hotel and cloud kitchen leads. Build referral and partnership channels with restaurant groups and food-service networks. Increase budgets on the best-performing ads, launch retargeting flows, and prepare outreach beyond Delhi-NCR for steady traffic and B2B conversions.

BLOG CONTENT FOR SEO

- **Create blogs:** like “How to Choose a Reliable Vegetable Supplier for Your Restaurant”, “Benefits of Ready-to-Use Cut Vegetables for Cloud Kitchens”, or “Mandi vs Direct Farm Sourcing: What Restaurants Should Know” to capture high-intent B2B traffic. (Target long-tail and informational keywords)

- **Answer user questions:** write FAQ-rich content such as “How do restaurants keep vegetables fresh during delivery?”, “What do GAP, FSSAI, NSF and ISO certifications mean for food suppliers?”, and “Can a supplier provide cut and frozen vegetables to order?”. Use FAQ schema to rank for voice search and rich snippets.

- **Internal linking strategy:** link blog posts to product pages (fresh produce, cut vegetables, sauces and gravies), the case study and the quote request form to strengthen authority and guide readers toward enquiries and conversions.

- **Keywords:** You can add the target keywords from your keyword research slide under each blog title, for example “vegetable supplier for restaurants” for the first blog.

- **Product pages:** “Link to product pages” works only if fambo.in has separate product pages. From the homepage I saw one page with product categories, so you can say “link to the products section and the quote form.”

SEO KPIs TO TRACK : 1/2

SEO KPIs TO TRACK : 2/2

ORGANIZATION TEAM STRUCTURE : 1/2

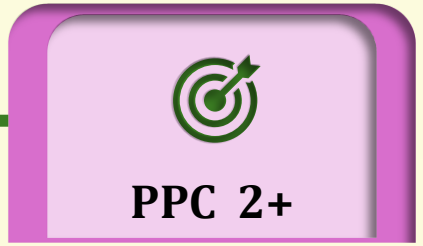

ORGANIZATION TEAM STRUCTURE :2/2

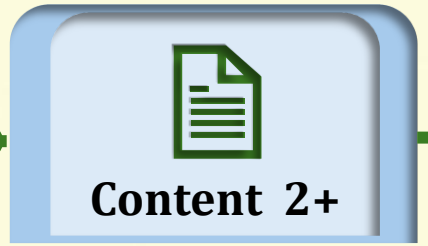

Approx. 8 – 10 People working on the project

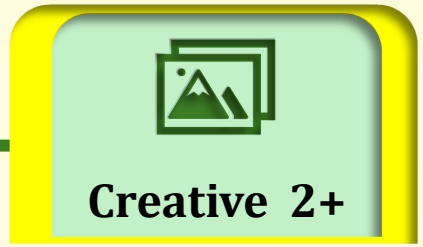

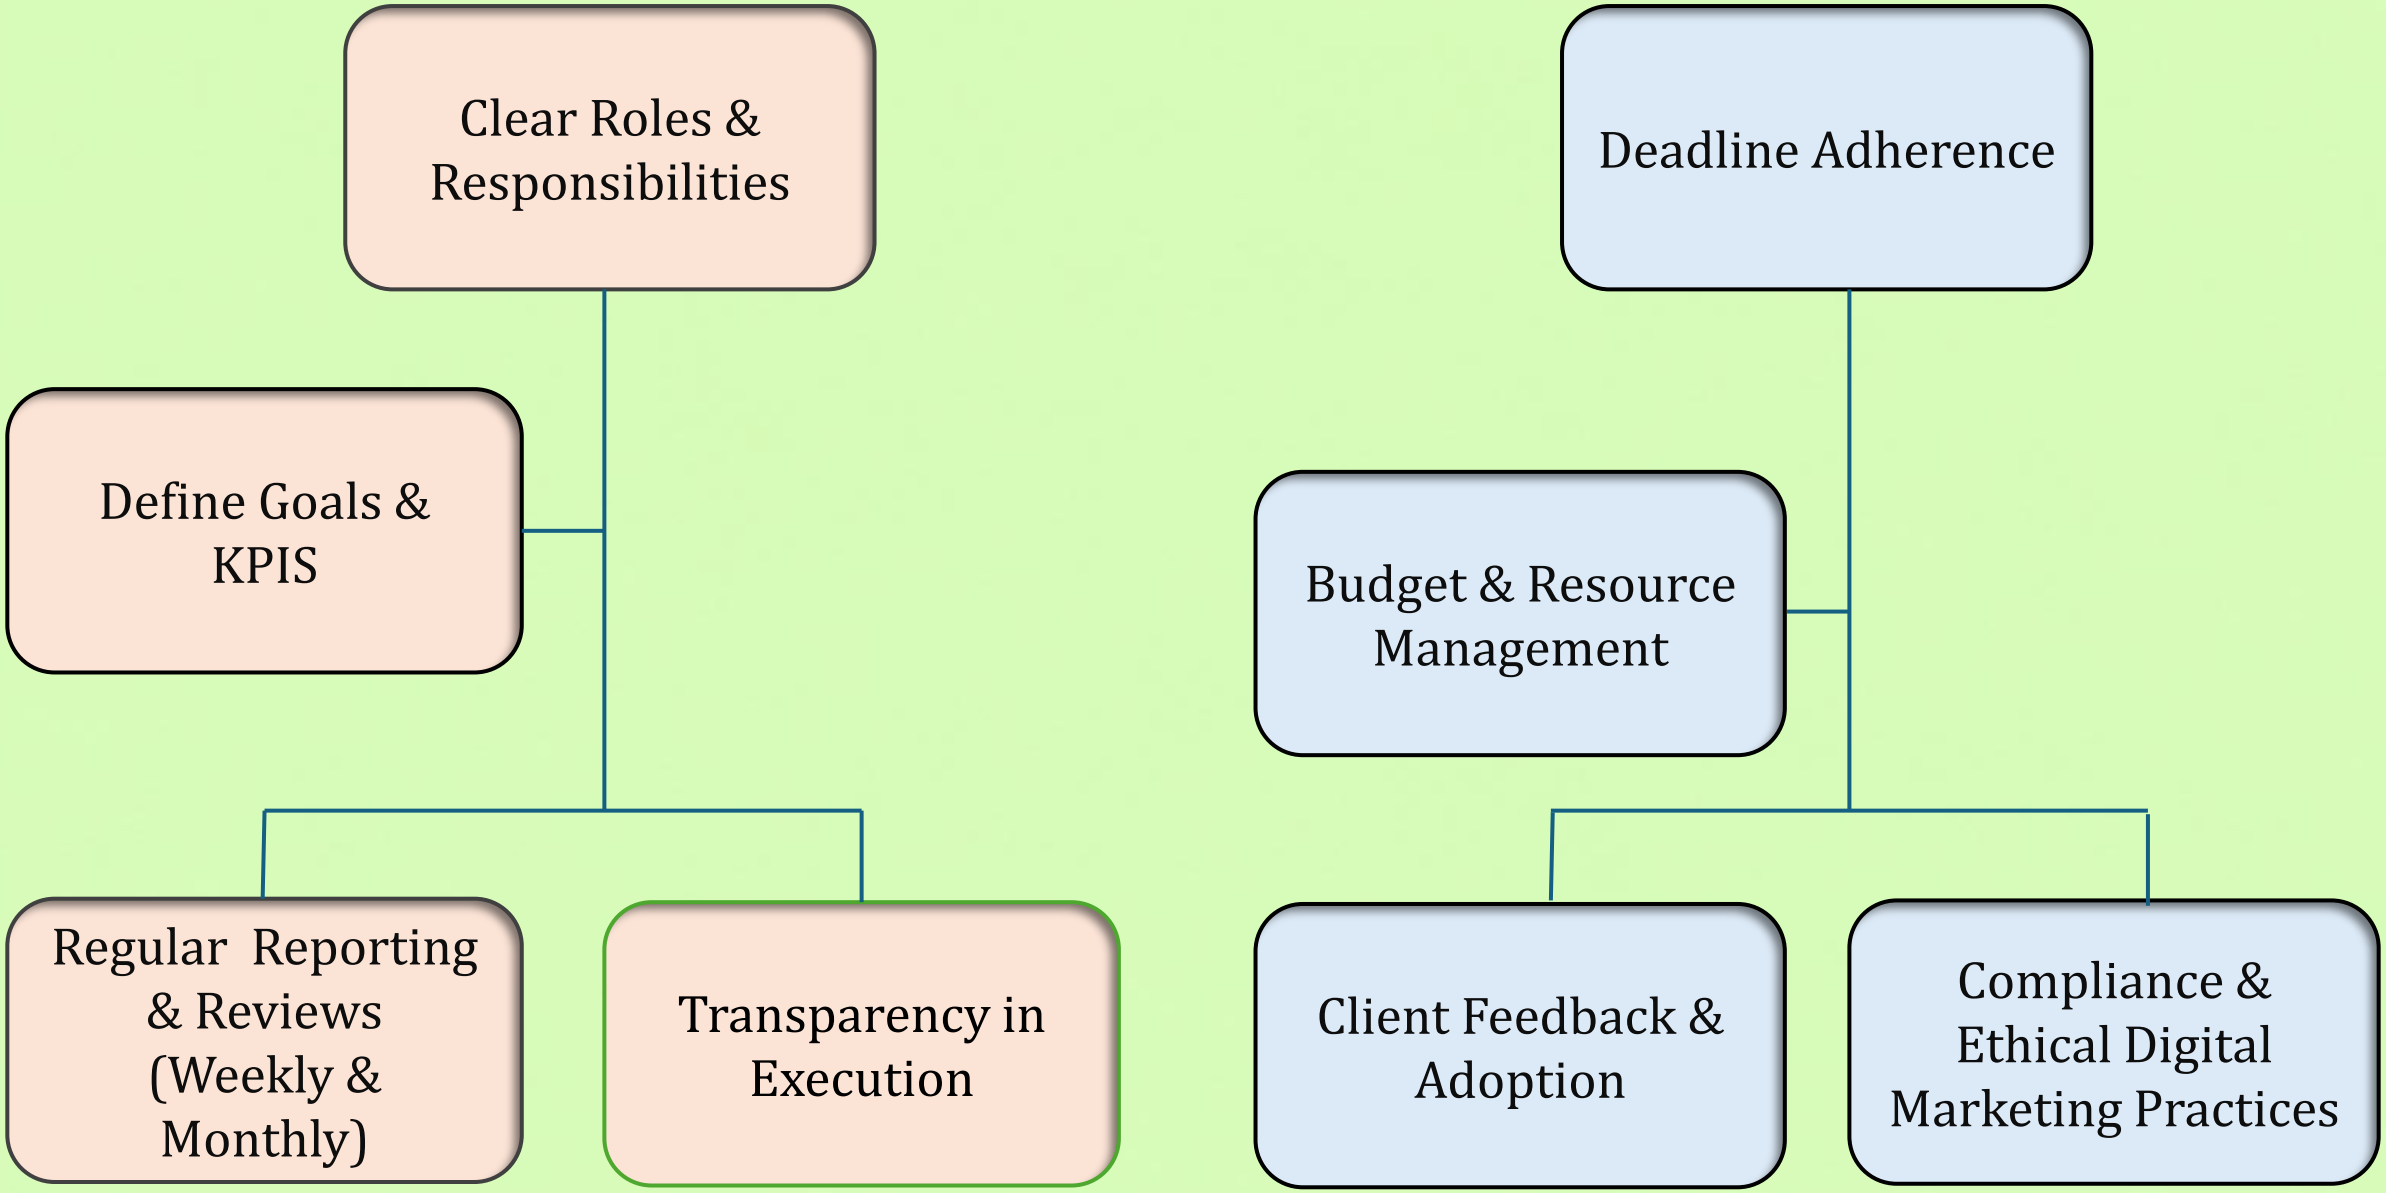

ACCOUNTABILITY : 1/2

- **Weekly work update** to track campaign progress, lead and quote-request volume, and platform performance (website, LinkedIn, Instagram, Google Ads).
- **Every 2 months, a detailed strategy meeting** to review and refine marketing and B2B outreach plans, so the strategy is built together with Fambo's sales and operations teams.
- **Monthly review meetings** a deep dive into KPIs, keywords, customer enquiries and content (blogs, reels, case studies), covering what is working, what is missing and what to fix.
- **Accurate, ethical promotion:** every post and ad must be truthful and free from misleading claims about quality, certifications (GAP, FSSAI, NSF, ISO), delivery or pricing. Client names, logos and testimonials are used only with written approval.

ACCOUNTABILITY : 2/2

ACTIVITIES

- **Search & Display Ads:** Run targeted Google Ads (and LinkedIn Ads) to promote fresh produce and ready-to-use ingredients to restaurant owners, cloud kitchens, hotels and procurement managers across Delhi-NCR.
- **Social Media Campaigns:** Share product spotlights, farm-to-fork stories, quality and safety updates, and customer testimonials across LinkedIn, Instagram, Facebook and YouTube to build trust and awareness.
- **SEO & Content Marketing:** Publish keyword-optimized blogs, guides and case studies on kitchen procurement, food safety standards and ready-to-use ingredients to boost organic traffic and attract B2B leads.
- **Email & WhatsApp Marketing:** Send product updates, offers and quote follow-ups to opted-in business contacts by email and WhatsApp, which fambo.in lists as an ordering channel, to nurture potential clients.
- **Video Marketing:** Launch YouTube Shorts and Reels showing the processing centre, temperature-controlled delivery and easy ordering, plus approved client success stories.

Thank
you
